

RACIR 2019

June 5-6, Liège

The third edition of the Robotix Academy Conference for Industrial Robotics (RACIR 2019) will be held this year at the University of Liège, Belgium from June 5th to 6th.

Context:

The Robotix Academy is a research cluster in the field of industrial robotics in the Greater Region. One of the strengths of the Robotix Academy project lies in the wide range of research activities and expertise of its 5 academic partners: Zema, University of Liège, University of Luxembourg, Université de Lorraine and Umwelt Campus Birkenfeld. The network organizes summer schools, scientific conferences and joint training activities, which stimulate cross-border synergies as well as the pooling of resources, skills and research results. A network of master and doctoral students from the Greater Region and elsewhere is weaving little by little.

Scope:

The conference will focus on various aspects on industrial robotics and automation. The topics will include, but not be limited to, the following : robot control, human-robot interaction, assisted assembly/disassembly, automated manipulation, robot design, service robots, robotics in automation, biomedical applications, autonomous vehicles (land, sea, and air), robot perception, sensor information, robot vision, sensor/ actuator networks.

Call for contribution:

Prospective authors are invited to submit high-quality papers representing original results in the area of industrial robotics. Papers will be published on the Robotix Academy book and website.

Oral presentation : 20-minutes presentation + 10-minutes discussion

Important dates :

Registration for participation : **01/05/2019**

Paper submission : **25/05/2019**
